## **PC Board Rebuilt/Exchange Policy**

Boards kept in stock have both a list price and a core price. These boards are available for immediate shipment on an exchange basis. You may either send in your board for exchange or order a stocked board and send your defective board later. If you choose to send your board later, you will be billed for both the core price and the list price of the rebuilt board you are ordering. Once we receive your defective "core" (provided the returned board is salvageable), we credit the core value of that board to your account.

Example:

If you order an Airco board, part # 1371-0374R, you will be invoiced the following:

"List" \$160.68	
+ "Core" \$58.92	
	<hr/>
	\$219.60 + Freight

When we receive your defective board and confirm that it is repairable, we issue a credit of \$58.92 on another invoice. Your end cost is \$160.68 plus freight.

All boards are repaired in batches, so the board you receive back may be a different board from the one you sent. Expedite orders and special requests may require an additional handling charge.
