

PlazCraft®

Arc Products manufactures the entire PlazCraft® product line of plasma torches, parts and accessories.

We offer:

- **PC30II**
60 AMP, hand torch with 75° head
- **PC35II**
100 AMP, hand torch with 75° head
- **PC40II**
100 AMP, hand torch with 90° head
- **PC30MII**
100 AMP, machine torch with remote control

PlazCraft: the Ideal Replacement Plasma Torch

SAFETY

The PC II high visibility "Safety Yellow" trigger, ergonomic handle and parts-in-place safety circuit are key features to promote operator safety.

VERSATILITY

PlazCraft made the industry's first replacement plasma torch. PlazCraft torches work great with over 70 of the most popular power supplies... new or old, import or domestic.

SIMPLICITY

PlazCraft torches are easily repaired in the field with a small number of replacement parts. Torch parts inventory is greatly simplified for multiple power sources.

QUALITY

The PC II has a limited one-year warranty and our commitment to manufacture only the finest precision components.

AVAILABILITY

Our domestic and international distribution ensures quick delivery.

Special Features Designed Into All PlazCraft Torches:

A International compatible, parts-in-place safety circuit.

B Heavy duty two-piece contoured handle.

C Single Gas "Split Flow" Design
Primary Flow: Gas directly cools the electrode, and is then focused through the plenum area to form the super-heated plasma jet.

Secondary Flow: Cools the torch body, cutting tip and shield cup. Results in excellent cut quality and improved parts life.

D Cable strain relief prevents hose from kinking and restricting air flow.

E Modular torch body design for easy repair and maintenance. Don't scrap what you can repair simply and inexpensively.

F Universal-style fittings allow a single torch to be hooked-up to over 80 of the most popular plasma power supplies... new or old, import or domestic.

G Cable cover provides protection for lead assemblies.

HOW TO ORDER:

1. Choose a TORCH PACKAGE.

Each torch package includes an assembled torch head, installed shield cup, cutting tip, safety sleeve, electrode and power cable.

2. Choose a HOOKUP KIT for your power supply.

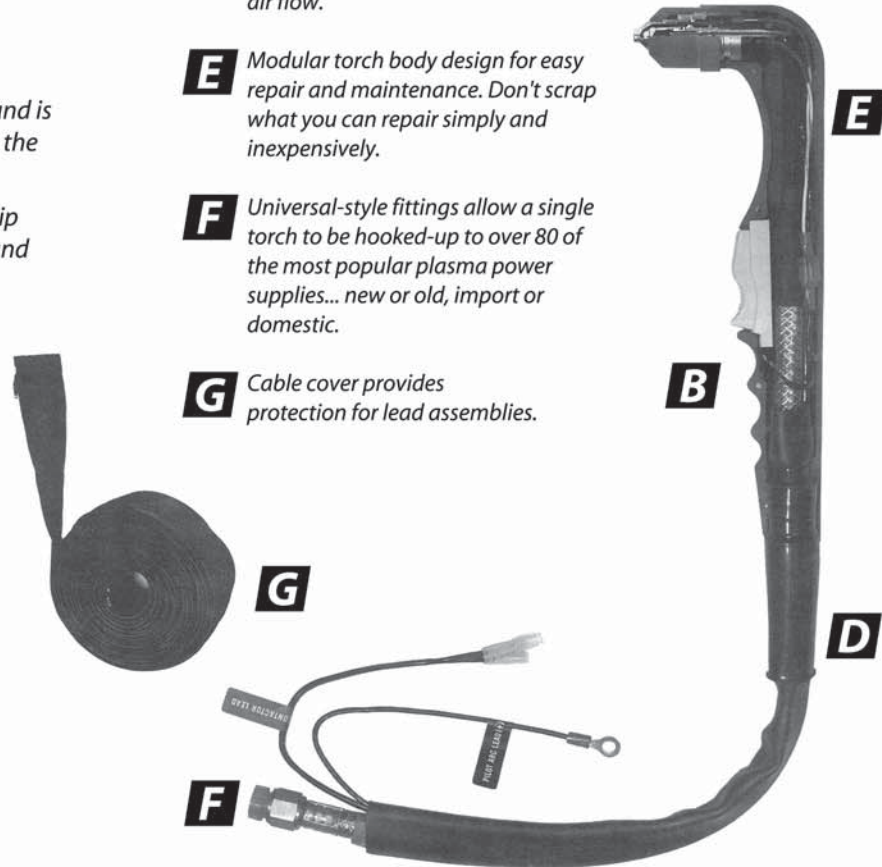

Each hookup kit includes connection fittings for the selected power supply.

3. Choose the appropriate ACCESSORY KIT for your cutting application.

Each accessory kit includes all front end parts for a selected plasma application at a selected amperage. Choosing the correct front end parts will assure maximum performance from PlazCraft torch packages.

4. Note that REPLACEMENT PARTS are available when the time comes to maintain your torch in the field. Modular design means that PlazCraft is truly "the last plasma torch you'll ever buy."

Replacement parts can be purchased separately to maintain and extend the life of PlazCraft torches.
